JuCad – The Original. Unique. Valuable.

Every JuCad is an original in unique quality – handmade in Germany. The extraordinary design and the long lasting value, make a timeless classic of each handcrafted trolley. With its highly efficient technology such as the intelligent placement of the high-tech motors inside the drive shaft, the ultra-light weight, the variety of different packing sizes – foldable or detachable – every JuCad trolley becomes an exceptional masterpiece, offering a lot of benefits to its user.

JuCad

JuCad – founder of the design class

For 38 years, JUTEC Biegesysteme GmbH, based in Limburg / Germany, succeeds internationally with their golf trolley brand JuCad and enjoys an unrivalled reputation for excellence, performance and prestige. Already in 1988, the renowned company produced the first folding designer golf trolley in stainless steel with 3-spoke wheel rims. In 1998, the family owned business developed the next generation of JuCad designer trolleys, the stainless steel electric trolley, with invisible cables and motors integrated into the axle. This brought on a new milestone in the trolley industry and at the same time introduced another technical innovation - the "hidden" storage of the battery including control unit inside the golf bag. By launching the JuCad Phantom with its worldwide unique single-spoke wheels rims made of full carbon back in 2014, JuCad proved once again to be a pioneer in the golf sector. In 2017, the JuCad brand was awarded the coveted "German Brand Award" and named Brand of the Year in the Golf Equipment category. The new and innovative trolley JuCad Ghost Titan was awarded the popular "German Design Award" in 2018.

Precious JuCad trolleys are created for golfers, who appreciate high-class quality. The design is encouraged by passion for golf trolleys and golf sport. The vast innovative capacity of the brand with regard to design, marketing and communication is in the capable hands of Kira Jung. Particular customer needs are the motivation for the permanent enhancement of the JuCad trolleys and the defined goal to develop the matching trolley for each golfer.

For this reason, JuCad is the first manufacturer within the golf industry to provide an online trolley configurator on their website. The brand JuCad is a symbol for colour variety that vitalizes the fairways with a refreshing and extraordinary design.

Only the purest high-class materials such as titanium, carbon and stainless steel are used during the production process. Combining high-precision machinery with expert handcraft and attention to the detail, each JuCad trolley is the very definition of excellence and quality. At five different production facilities in Limburg / Germany, a highly specialized team manufactures sustainable and sturdy golf caddies in unique depth of added value. The internationally successful company with 100 employees has been managed for over 20 years in second generation by Kira and Jörg Jung.

Since the establishment, the company has travelled a long way but the mission has remained unaltered: to make unique golf trolleys that represent the finest German design and craftsmanship and are simply state of the art.

In the newly opened, ultramodern JuCad Centre, with 2000 m² of exhibition and service space, the JuCad team is available for intensive and detailed advice on JuCad product diversity and colourfulness, as well as for dealer training. All JuCad trolleys, as well as all golf bag models and JuCad accessories will be presented in the new premises. The service centere is located on the second level, equipped with the most modern technology tools.

Awards and partners

German Design Award

The German Design Award is one of the most recognized design competitions worldwide and enjoys an great reputation far beyond professional circles. Its goal: To discover, present and award unique design trends. The JuCad Ghost Titan was awarded the German Design Award in 2018.

Plus X Award

The Plus X Award for the best brands and products worldwide, is the most important innovation award with regard to technology, sport and lifestyle. The project was initiated 14 years ago with the aim to protect and strengthen brands and traders. Worthy representatives for the Plus X award are only products which combine particular characteristics such as new and innovative technology, extraordinary design, ergonomic and ecological benefit, high-class materials and manufacturing processes as well as intelligent and smart handling concepts. The unique JuCad Phantom Titan was awarded three times in the categories high quality, design and ease of use. In addition, JuCad was honoured with the Brand of the Year Award for 2017 in the product category golf equipment.

German Brand Award

The German Brand Award is a prize for successful brand management in Germany. The award is consequently very sought-after because it credibly proves the brand's quality. The independent jury, composed of companies, science organizations, consulting, service industry and agencies, awards prizes to unique brands. JuCad was distinguished in the category "Industry Excellence in Branding".

Red Dot Design Award

The design competition Red Dot exists since 1954 and its award the "Red Dot" is a worldwide approved seal of quality. Only the best products get awarded for their unique design. The JuCad Phantom with its worldwide unrivalled single-spokes made of full carbon belongs since 2015 to the selected choice.

The Major German Brands

With its unique design and the high-innovative potential, JuCad counts to the most valuable brands in Germany and therefore belongs to the Major German Brands 2016.

German Design Council

As the first manufacturer within the golf branch, JuCad was announced to become a member of the German Design Council. For over 60 years, the German Design Council is an institution in the German industry - counting over 230 renowned members, which have all one in common: their products are unique, noble and have an elegant design. The committee is one of the worldwide leading competence-centres for design and committed itself and its members to a fair competition.

DGV - German Golf Association and golf.de

Committed to golf, JuCad is engaged as the official co-sponsor of the German Golf Association and golf.de by actively promoting its further development.

GMVD - Golf Management Association Germany

As member of the Golf Management Association Germany (GMVD), JuCad is part of the network of the professional institution and contributes to the improvement of apprenticeship and education.

JuCao

German craftmanship in completion

For 38 years we are producing with passion bending systems for the air- and spacecraft industry, plant construction and automotive applications. Against this background in manufacturing experience, we have started in 1988 to develop complex tube bending pieces for golf trolleys. Our longtime know-how enables us at any time to fulfill the highest demands in shaping and material combination with the help of design.

Modern technology and the usage of exclusive high-grade materials, make an original with enduring value of every JuCad trolley. The concentration on the essential with an eye for individuality and sustainability are self-evident, as we have high demands to ourselves and the way we produce. A world, where trend-setting materials, innovative technology and functional elegance are aligned to a timeless design. First-class quality as well as a flexible and quick customer service are our top priority. The creation of enduring valuable products, while never losing sight of the people, gives a good feeling to us and our partners. Your pleasure and your product benefit are our motivation. Welcome to the world of JuCad!

1. Every JuCad trolley is a masterpiece of perfectly welded joints.

2. All JuCad models are finished by hand as the only means to achieve their distinctive surface lustre.

3. We use high-precision CNC lathes and milling machines for undeviating accuracy – quality made in Germany.

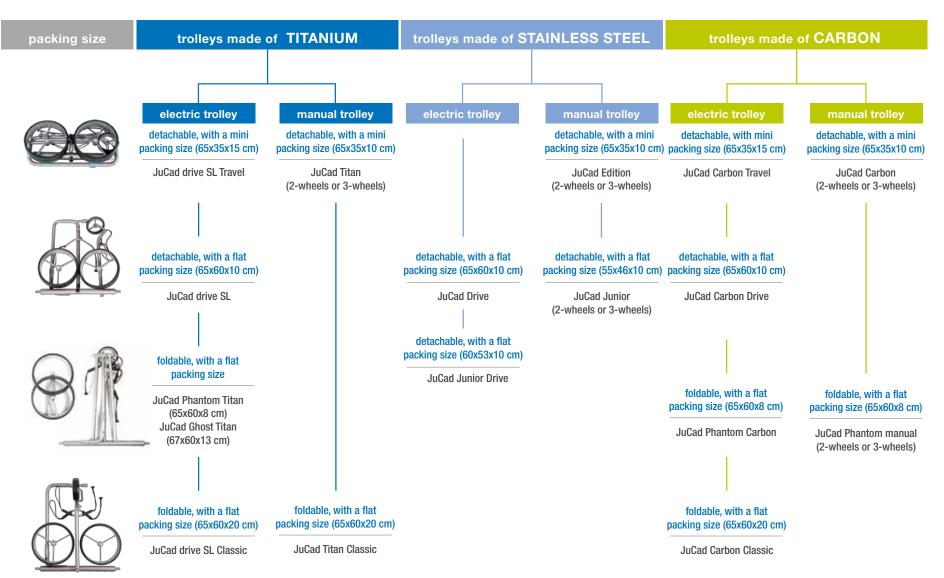

4. Our multi-axis machines assure absolutely precise matching fits.

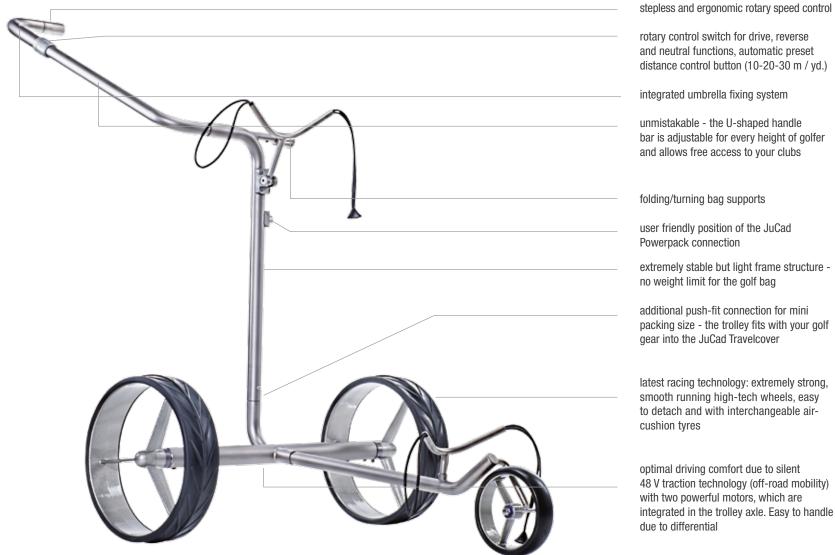

Overview of the JuCad trolley world

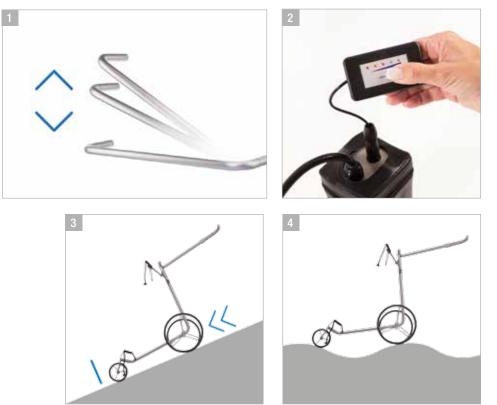

Here you will only find the JuCad base models. All special edition models have equal characteristics as the appropriate base model.

Perfection is recognized by the detail:

JuCad drive SL Travel

JuCad – streets ahead through sophisticated and reliable technology

1. The right handle position for every height of golfer – the handle bar with crown teeth arrestment is adjustable to suit every individual.

2. Charge state display – with the help of the JuCad charge state display, you can check the charging condition of your JuCad Powerpack. The light-emitting diodes reflect the state of charge by five levels, each 20%.

3. Electronic downhill brake and parking brake

All electric JuCad trolleys are equipped with an electronic downhill brake and a cruise control, providing driving comfort on all fairways. When buying a new JuCad trolley you can opt for an additional parking brake for security even on extremely steep terrains. The JuCad parking brake guarantees a safe stand for the trolley.

4. Off-road mobility and differential

Optimal driving comfort due to traction technology (off-road mobility). Easy to handle due to differential.

JuCad

5. Special lacquering – JuCad offers a large variety of colours. Upon request, we will fulfill also special requirements.

6. Powerlock – the JuCad Powerlock system with hinged lever allows simultaneous fixing of handle bar and upper bag support, adapting to any height of golfer and golf bag.

7. All electric JuCad trolleys come with a very compact JuCad Powerpack and a small, handy fast charger. The extra light JuCad Powerpack weighs only 1.5 kg / 3.3 lb and is securely stored inside the golf bag to guarantee its long service life. It contains a secure high-performance lithium battery with an endurance of up to 45 holes, an energy recuperation system as well as the control unit. JuCad Powerpacks are certified according to the UN transport test BU-2013-000559-UN and are in compliance with all legal transport and safety regulations. For your journey via plane, JuCad offers a certified flight battery set (2 x 83 wh).

8. Elegant rotary control switch for easy and secure operation between forward, reverse (depending on model), neutral and 10-20-30 m / yd. preset distance function. All electric trolley models can be driven in reverse with the optional remote control.

9. The JuCad remote control for more driving pleasure – the trolley can be controlled at any time either by the stepless turning control on the handle or with the clearly layed-out remote control for movement in any direction. Your golf equipment is therefore always at the right place sparing you unnecessary walking. Every JuCad remote control has its own unique transmission code to prevent misdirection – beyond the transmission range the trolley will come to an automatic halt. The JuCad remote control is an optional extra for all electric JuCad trolleys.

10. Engravement – all JuCad trolleys can be provided with a personal etching.

JuCad Phantom Titan eX

Trolley art with exclusive equipment

The JuCad Phantom with its unique singlespoke full carbon rims is now available including high-class equipment at a special price. The electric trolley comes with a practical transportation bag, a remote control, the JuCad parking brake for security even on extremely steep terrains, as well as the JuCad charge state display, which indicates the charging condition of the JuCad Powerpack.

The technical characteristics are equal to those of JuCad Phantom Titan on page 15.

The JuCad Powerlock with hinged lever for simultaneous fixing of handle bar and upper bag support.

With revolutionary magnetic plug for a safe and fast charging process.

JuCad Phantom Titan

Unique trolley art

This electric titanium JuCad trolley is moving almost phantom-like over the fairway on its unmatched designer wheels. The elegant singlespoke full carbon rims are a sensation of their own. With these rims and the slender titanium frame, highlighted by the well known single bracked wheel support and the elegant handle bar with stepless speed control, the trolley seems to be floating. The comfortable folding technique allows to bring the trolley within seconds to a super flat packing size and to store it away easily. Utmost driving comfort is guaranteed by the extremely stiff titanium frame, the powerful and noiseless 48V traction system with drive, reverse and neutral functions as well as automatic preset distance button and the optional remote control. Another highlight is the JuCad Powerlock that allows the simultaneous and flexible fixing of the height adjustable handle bar and the upper bag support. The JuCad Phantom Titan will be provided with an extra flat carry bag and a separate wheel cover.

TITANIUM 5 on

JuCad drive SL Travel

The best-selling electric JuCad trolley made of titanium

Weighing only 5.9 kg / 13 lb the JuCad drive SL Travel is also a flyweight amongst golf trolleys. This super-light electric trolley in high grade titanium with a satin finish surface offers sporting elegance and maximum flexibility. The JuCad drive SL Travel has an additional push-joint to achieve its minuscule travel packing size. Given this folded size it will fit not only into the boot of any sports car but also inside the Travelcover in addition to your golf bag. An environment-friendly high-performance lithium battery provides ample power for up to 45 holes and is invisibly stored inside the golf bag. The intelligent JuCad traction system has a permanent two-wheel drive with two axle integrated high-tech motors plus an electronic braking system giving optimal performance even on steep mountain courses. The comfortable rotary control switch with D=drive, N=neutral and R=reverse functions together with the preset distance option add to the trolley's distinctive features. Of course, the elegant electric trolley guarantees despite its low weight absolute stability and it is, like all JuCad models, also suitable for heavy bags.

JuCad Ghost Titan

5 year warranty on all JuCad titanium frames

JuCad Ghost Titan

The folding Titan of the newest generation

The new electric trolley JuCad Ghost Titan with the two-spoke wheel rims and proven technical JuCad features moves super quiet over the fairways with the latest control and drive technology "brushless".

In addition to the electronic downhill brake, the electronic parking brake ensures for a firm and secure trolley even on extremely steep terrains. With the sturdy T-handle, ambidextrous handling of the trolley is given, providing a secure grip on uneven terrain. In addition, a tilt-adjustable umbrella fixing system is integrated in the T-handle. Particularly useful is the magnetic plug on the charger and – brand new – on the Powerpack and trolley which ensures a very fast and secure connection. The innovative JuCad Ghost Titan has been awarded the coveted "German Design Award" as Winner 2018.

JuCad Drive

The comfortable electric trolley in stainless steel

The elegant JuCad Drive electric golf trolley in high-quality stainless steel is in precision, robustness and functionality a competitive alternative to the exclusive lightweight electric JuCad trolleys in titanium. This comfortable trolley with a single push-fit connection and especially flat packing size can fit into most even small car boots. Its drive train concept with two invisible powerful high-tech motors guarantees quiet and fluent performance. The user-friendly rotary speed control and electronic downhill brake provide the same ease of use even on difficult terrain. The environment friendly power pack with its state of the art lithium technology is safely stored inside your golf bag – this guarantees a long lifetime of the technology and the design of the trolley stays sportive and elegant.

JuCad Edition, 3-wheel version

JuCad Edition

The indestructible golf trolley

Timeless design and absolute stability guarantee a pleasurable round for the modern golfer. The unpowered trolley in quality fabricated stainless steel can be assembled or dissembled in seconds. The height adjustable handle bar provides for stress free pulling or pushing, leaving the back-muscles relaxed with no strain on the spine. The JuCad Edition is extremely stable and will support the heaviest bags of golf pros. Its mini packing size when folded makes it an ideal companion for air travelling golfers when it fits also inside the Travelcover. The JuCad Edition is always supplied in its robust and practical carry bag. This trolley is also available with a convenient arresting brake.

JuCad Junior, 3-wheel version - bag Junior

JuCad Junior

For our youngest golfers

The technical characteristics of this special model for children are similar to its "big brother" JuCad Edition, made from stainless steel. The easily maneuverable lightweight with its small packing size is the perfect start for the youngest golfers. The height adjustable handle bar can be set to suit to your child's size and ensures pull or push operation of the bag-laden trolley that is easy on the back. With the JuCad Junior golfing will be a simple pleasure for your children. The JuCad Junior can also be supplied as 2-wheel version or as electric trolley. For all young golfers up to 150 cm (4'10") height.

Simply colourful - chose with your child the favourite colour combination

JuCad Phantom Carbon and JuCad Phantom Carbon White

JuCad Phantom Carbon JuCad Phantom Carbon White

The electric trolley with magic appearance

The JuCad Phantom Carbon - now also available with a noble, white finish – is a true design object. Thanks to the modern and precious carbon material this model is even more innovative in design, following the slogan: square meets round! A specially futuristic look is created by the unique singlespoke full carbon wheels of the JuCad Phantom Carbon – its uncompared elegance on the fairway will be hard to beat ! Thanks to the convenient folding mechanism a superflat packing size is reached within seconds. Maximum driving comfort is guaranteed by the extremely stable full carbon frame, the powerful and silent 48V propulsion system with forward, reverse and neutral functions as well as the optional remote control. The specially developed JuCad Powerlock allows a simultaneous fixation of the upper bag holder and the handle bar. Also for the charging process a revolutionary technology is applied to make charging faster and safer: the contacts are fixed magnetically and when "unplugged" the charging port is without electric power. The JuCad Phantom Carbon comes with a super slim carry bag.

Details JuCad Phantom Carbon:

CARBON

- > simple operation with stepless rotary speed control

With revolutionary magnetic plug for a safe and fast charging process.

JuCad Carbon Travel

The modern electric golf trolley with mini packing size

This carbon electric trolley in the elegant JuCad design is built in an elaborate production process of a carbon fibre composite material. Thanks to its extremely robust full carbon frame, which was specially designed by us for the particular demands on the golf course, this trolley features absolute stability despite its low weight of only 5.8 kg / 12.8 lb. The JuCad Carbon Travel trolley has a second push-fit connection to achieve a mini packing size for voyages. It is an ideal air travel companion and can be stowed in the JuCad Travelcover together with your golf bag – you travel only with a single piece of luggage. The stepless speed control, the automatic preset distance function and the quiet all-wheel drive train with its two high-performance motors make every round of golf a pleasurable experience. The JuCad remote control is an available option and would avoid unnecessary walking distances for an even more enjoyable round of golf.

JuCad Camouflage – bag Aquastop

JuCad Camouflage

The electric trolley with a trendy camouflage design

This cool golf trolley will be THE eye-catcher on the fairway! The electric JuCad Travel model with its superlight carbon frame comes with a black basic coating and a camouflage artwork in red, grey and green on top. The stylish but still classy look is completed with the matching JuCad bag.

Like all electric JuCad trolleys, this model comes with two powerful engines which are concealed inside the axle, while the battery is hidden in the golf bag. With its well-proven mini packing size and the ultra-light weight, the JuCad Camouflage equates to the technical characteristics of the JuCad Carbon Travel on page 41.

New: The JuCad Camouflage is now also available as a manually operated trolley!

JuCad Carbon Drive

JuCad Carbon Drive

The modern electric trolley

The JuCad trolley Carbon Drive with its unique lustrous carbon surface is characterized by its user friendly technology and high quality finish. The elegant silhouette of the full carbon frame is free from the clutter of visible cables, battery or motors, which leaves it not obvious as an electric trolley. With only 5.5 kg / 12 lb this lightweight proves to be an absolute front-runner in the electric trolley league. Yet, this model has no weight limit for the golf bag. The stepless rotary speed control activates all movement as part of the proven JuCad technology to ensure comfortable ease of use. The powerful drive train can maintain the level of comfort even on moun-tainous region golf courses. After your game the trolley can quickly be taken apart for stowage in the carry bag or in the boot of your car.

art. no. JCD | EUR 2,890.-

Whether classic, stylish or colourful - the options are endless ...

Your personal unique trolley in a few steps on www.jucad.de/en

With our caddy tool you are able to assemble in a few clicks your personal trolley. Coloured rims, tyres, bags, scorecard holder and much more. Everything can be combined. Just give it a try!

Online trolley comparison

Please make use of the practical online model comparison. All important features and advantages of each trolley model at a glance - the easy way to the JuCad model of your dreams.

Show your colours with the modern JuCad wheel

1 Comfortable technology

The original JuCad wheel is simply plugged in - nothing more simple than that!

2 Tyres

These tyre colours are available for your trolley. The tyres can be changed at any time. (EUR 60.- for 2-wheel models, EUR 80.- for 3-wheel models).

3 Winter sleeves

JuCad winter sleeves allow you a comfortable and secure round of golf even in the cold season. The rubber spikes on the tires reduce ground contact by up to 75%, which allows a fairway-friendly driving and prevents spinning of the wheels. The 2 winter sleeves can be drawn quickly and easily over the rear wheels of your JuCad trolley. Art. no. JWR, EUR 50.-

4 Wheel rims

The choice of colours caters for all wishes in combination with your golf bag and outfit. The original JuCad wheels are available in many colour combinations designed to match the exclusive JuCad golf bags. Rim and tyre colours can be freely combined, whithout surcharge. The JuCad wheel has a tyre profile specially geared for golf course conditions – the tyres can be changed at any time.

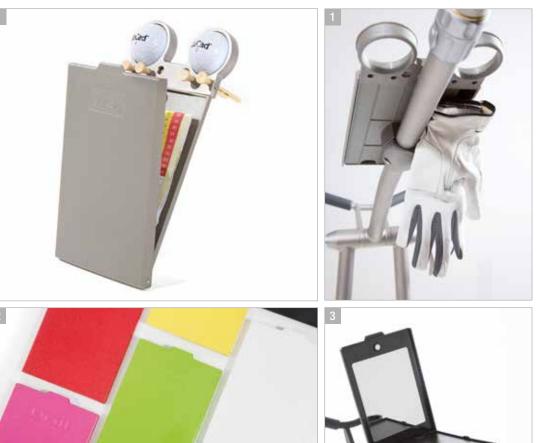

JuCad scorecard holder a practical accessory for your trolley

Not only protects your scorecard, but keeps also important accessories such as balls, tees and pencil always at hand. The rain proof cover is provided with stainless steel hinges and a magnetic closure. Available in various colours.

1 Scorecard holder

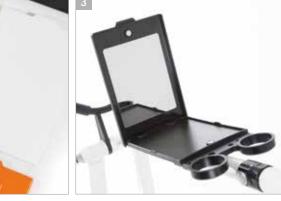

Also for tees, golf balls and pencil. With velcro glove holder at the bottom side. Art. no. JSH, EUR 100.-

2 Cover

The rainproof cover for the scorecard holder is available in various colours to match with your wheel rims.

3 Mirror

Unbreakable mirror made of stainless steel. Can be taped directly into the scorecard holder lid for a quick routine glance during your round of golf. Measures 13x10 cm / 5x4 inch. Art. no. JSPI, EUR 20.-

JuCad Tablet[®] – the new multifunctional accessory for your trolley

NEW

With the help of the elegant JuCad Tablet[®] made of high-class metal in the colours titanium or black, your golf equipment is always at hand! The JuCad Tablet offers fixing options for the following equipment: 3 golf balls, 8 tees (wood- and plastic-tees), a pencil, a pair of gloves, a smartphone, the JuCad remote control, the JuCad golf towel, the JuCad GPS-holder or the JuCad cigar holder. Matching for all JuCad trolley models. The JuCad Tablet[®] received the status "registered design" by the EU Intellectual Property Office (EUIPO) and is therefor unique.

JuCad golf accessories – practical and well thought out

The practical and functional JuCad golf accessories complete your equipment and guarantee an even more enjoyable golfing experience: Whether the classy putter, colourful towels and caps or the little helpers for a round of golf, such as the club brush, ball retriever, divot tool and golf ball. Original gift ideas, such as the JuCad mini bag, also usable as a trash bin basket or the exclusive champagne trolley induces the golfer's heart to beat faster.

JuCad titanium putter and JuCad putter grips

Golf accessories

1 JuCad putter Titanium

A unique putting feel is provided by the CNC-cut JuCad titanium putter. The heavy and low weight distribution gives good balance. The head is manufactured from solid titanium with a precision cut putting surface ensuring a reactive feedback to learn from the feel your putt. Available right or left handed, or as a pendulum putter. Delivery with convenient JuCad jumbo putter grip. Head weight: 450 g. Available in 32-36 inch, standard size 35 inch. Art. no. JPXTI. EUR 350.-

2 JuCad Jumbo putter grips

Upgrade your putter with this exclusive putter grip. The soft and grippy material ensures a good putting feeling. Wide range of colours, matching most brands and types of putters. Art. no. JPG1 to JPG12. EUR 20.-

JuCad stainless steel putters

1 JuCad putter X900

The noble design of this stainless steel JuCad putter is eye catching. Striking are the CNC-milled face and the dual finish in glare-free mat optic. The middle pin is available in two colours and continues the target line for a precise alignment. The JuCad jumbo putter grip of the X900 ensures a firm hold and provides additional confidence and control on the green. A surprisingly forgiving and easy to play putter for a perfect feeling on the green. The JuCad X900 can be offered with a personal or name engravement (up to 20 characters on each side). With a mat black or mat white pin. Head weight: 365 g. Available in 32-36 inch, standard size 35 inch. EUR 220.-

art. no. JPX900-S (with black pin) art. no. JPX900-W (with white pin)

2 | 3 | 4 JuCad putter X stainless steel

All JuCad's stainless steel putters are precision-milled from a single piece thus ensuring a stable and sensitive putt. The continuous target line and matt, glare-free finish facilitate alignment. The CNC-milled face allows for constant ball-roll of the ball and optimal distance control. The putters come equipped with a JuCad jumbo putter grip (in a variety of colours). The soft-grip material sits comfortably in the hand and guarantees maximum security and comfort on the green. Putter lengths available from 32 to 36 inch, standard size 35 inch. EUR 200.-

Three versions are available: the **Blade Putter** with an extra-narrow head, the **Half-mallet Putter** and the **Mallet Putter** featuring a large rearward tapering head.

5 | 6 | 7 JuCad putter X matt black

New! The matt black putter series features high level craftsmanship and stands out through its sporty, elegant design. Precision-milled from a single piece, the tripleline layout – especially the solid red sight line – and the matt glare-free head contour support precise alignment. The grooved striking face intensifies ball contact and ensures a well-controlled, straight roll of the ball, even at a distance. The putters are equipped with a JuCad jumbo putter grip. The soft-grip material sits comfortably in the hand and guarantees maximum security and comfort on the green. Grips can be chosen from a variety of colours. Putter lengths available from 32 to 36 inch, standard size 35 inch. EUR 250.-
