

## Storage of your JuCad Travel model inside the travelcovers JTC-1 and JTC-XL

# JuCad®

It's your play. The Original.

Dear customer,

Thank you for choosing a JuCad travelcover, which enables you not only to store your golf equipment but also your JuCad golf trolley (models with 2 push-pull connections/ mini packing size only).

### How it works:

Your new Travelcover is provided inside with two big zipper pockets at the back. Please stow the wheels of your JuCad trolley in the upper zipper pocket and the main unit (vertical axle with handle) inside the lower zipper pocket (pic. 1). Like this the sturdy JuCad wheels provide additional protection for your clubs.

The two remaining trolley parts (wheel axle and front axle with/without front wheel) can be stowed right and left from the golf bag or directly inside the lateral or back pockets of your golf bag (pic. 2).

Due to the reinforced back and the padded sides and front of the travelcover all parts are protected for your journey on the plane. For additional safety and protection of your golf clubs, we recommend the JuCad Protector (art. no. JP).

**We wish you a safe and comfortable journey!**

**Your JuCad Team**
