

Storage of your JuCad Travel model inside the JTT carry bag

JuCad[®]

The Original

Dear customer,
this is the easiest and safest way to store your JuCad golf trolley inside your JuCad carry bag (art. JTT).

Your JuCad Team

How it works:

Store the upright with handle bar inside the upper zipper pocket of the carry bag. For better storage please lower the upper bag support first.

The two rear wheels are placed inside the main compartment of the carry bag.

Put the axle protector (two golf balls connected by rubber band) on the drive train and place the drive train behind the wheel. Turn the lower bag support of the front axle by 90° so it is aligned with the axle. Position the front axle with wheel diagonally on top of the rear wheels.

Place the protector golf ball on the plug of your powerpack. Stowe the powerpack and the charger in front of the wheels.
