

## Storage of your JuCad Travel model inside the JRT carry bag

# JuCad®

The Original

Dear customer,  
this is the easiest and safest way to store your JuCad golf trolley inside your JuCad transportation bag (art. JRT-1).

Your JuCad Team

### How it works:

Place the two rear wheels of your trolley inside the zipper pocket of your JRT-1 bag.

Store the handle of your JuCad Travel with fold down bag support at the bottom of the bag (if a scorecard holder is mounted, position it face down to avoid transport damages). The fixing knob for the handle should point towards the

outside edge of the bag to leave space for the powerpack and the charger between handle and edge. Place the protector golf ball on the plug of your powerpack before you stowe it.

Fold the separation cover over the handle and place the power train with axle protector (2 golf balls connected by rubber band) in the far corner on top. Turn the lower bag support of the front axle by 90° so it is aligned with the axle. Position the front axle with wheel diagonally inside the bag. The safety belts will protect your equipment additionally during transport.
