

JuCad Ghost Titan

The Ingenious Spirit ...

The art of optimising the best – JuCad, industry leader in the high-end electric trolley sector has done it again! Even before commencement of the new golfing season, this JuCad innovation has already been honoured with three prizes, the “German Design Award”, the “iF DESIGN AWARD” and the “reddot Design Award”!

The JuCad Ghost Titan conquers Fairways in 2018 with numerous innovations of golfer optimised design:

- JuCad's newest generation of trolleys can be folded down to an astonishingly flat packing size of only 67x60x13 cm within seconds!
- A practical butterfly handle facilitates effortless height adjustment of the handlebar.
- Thanks to two state-of-the-art control and drive technology, the electric titanium trolley moves spookily quietly across the fairways on its new **designer two-spoke wheels**.
- The new sturdy T-shaped handle for ambidextrous trolley handling provides additional stability on uneven terrain.
- **Particularly useful:** new magnetic plugs on both the trolley and power pack allow rapid connection almost “supernaturally” – simply by magnetic attraction!
- **Further remarkable features:** in addition to the electronic brake system, an electronic parking brake ensures the trolley remains stable and secure even on the steepest of slopes.
- **Power** is supplied by a smaller, lighter high-performance rechargeable Lithium battery with magnetic plugs for up to 45 holes – includes energy recuperation!
- New, “Easy to Use” remote control available as an option.
- **And many more proven JuCad details:** easy to manoeuvre trolley, even without battery; no visible cables, batteries or motors; extremely durable, smooth-running wheels are interchangeable and available in various rim and wheel colours – at no extra charge!

Price: 3,990 Euro
